

Building your business with the best in the business

Every successful enterprise needs a solid foundation. In the digital printing industry, the **Kodak NexPress** digital production color presses represent the state of the art. Offering a high degree of operational flexibility, modular expansion options, industry-leading user serviceability, and outstanding Kodak reproduction quality, the family of **NexPress** presses sets the standard — and sets a path for business growth and profitability.

The **Kodak NexPress** 2100 plus and 2500 presses continue the tradition of offering the winning combination of performance, quality, flexibility and reliability that **Kodak NexPress** systems are known for. Now with a choice of input, output, finishing and color options — as well as two output speeds — the standard has been raised even higher.

The **Kodak NexPress** 2100 plus and 2500 presses build on the strengths that **NexPress** systems are known for the world over: quality, consistency, reliability and uptime. With a monthly production capability beyond one million A4 pages, these presses are true workhorses, delivering consistently high-quality documents that command attention and drive business. Thanks to an unprecedented level of operator serviceability and an on-board knowledge base and diagnostic system, you're assured of high productivity and maximum uptime.

The 2100 plus and 2500 presses feature modular architecture so you can design a system that's right for your operation. Choose from multiple substrate feeder and delivery options, add the award-winning **Kodak NexPress** fifth imaging unit solutions, and power it all with one of several digital front-end configurations.
